PROFESSIONAL SUMMARY

Visionary developer and researcher bridging the gap between high-scale digital commerce and precision clinical diagnostics. Architect of modern, minimalist software ecosystems with a proven track record in complex e-commerce, automated logistics, and data-driven quality assessments.

CORE TECHNICAL ARCHITECTURE

Engineering: React, Next.js, TypeScript, Supabase, PostgreSQL, MongoDB, Redis, Tailwind CSS.

Research & Data: Clinical Quality Assurance (ISO 15189), Analytical Metric Analysis, Statistical Validation, Lab Service Optimization.

ENGINEERING PROJECTS

Elite / Merkato Store | Lead Developer

- Architected a multi-role e-commerce platform with integrated real-time delivery logistics and influencer collaboration modules.
- Implemented high-performance state management and Redis-based caching.

Premium Expense Tracker | Lead Developer

- Developed a sophisticated financial dashboard featuring glassmorphic design and high-frequency transaction animation.

RESEARCH ACHIEVEMENTS

Assessing the Quality of Clinical Chemistry Laboratory Services | Africa Medical College

- Systematic evaluation of referral laboratory services against ISO 15189 international standards.
- Analyzed analytical quality control, equipment calibration, and turnaround times to improve diagnostic accuracy.

PROFESSIONAL HIGHLIGHTS

Operational Excellence: Expert in leveraging AI to architect complex backend logic and modular frontend schemas.
